

Living Organ Donor Pilot Study
*The Ethical Dimensions of Living Organ Donation
from Donor Evaluation to Aftercare*

- The purpose of this research study is to understand what individuals experience when they donate a kidney.
- Individuals who have donated a kidney through living organ donation and would be willing to share their experience with researchers in an effort to understand the current standards and explore ways to improve live organ donation are eligible to participate.
 - You must be over 18 years of age to participate
- Study information
 - Study conducted as an interview
 - Interview will last between 60 and 90 minutes
 - Interview will be conducted over the phone
 - There will be no compensation for participation in this study
